- Nodejs, Express
- Mongo DB, MySQL
- AWS Solution Architect
- Git

## PROJECT

### 1. **E-commerce. (Internship Project)**

Stack: React, Express, MongoDB, Nodejs.

About: E-commerce is a multi-vendor website where seller can sell their products online and user can buy those products. This is an Internship Project. I work on Backend part of this application using Nodejs, express, MongoDB and some part of frontend using React.

### 2. **Book-Collection.**

Stack: Python, Tkinter, MongoDB.

About: This is a desktop application where different people group together to form a library. Through this application, users can request different books, and other users can gift those books to them and vice versa. Along with this user can also write their reviews on respective books and see the collection of other users
